NEIGHBORHOOD SKUNK WATCH

10. DO NOT complete this section UNLESS you were UNABLE TO IDENTIFY a SKUNK TYPE in Question #1!

Explanatory Note: It is not uncommon for many city residents to incorrectly identify wild animals that have strayed from their native habitat. In order to prevent our investigators from wasting valuable time on a wild skunk chase, please provide additional information on what you thought you saw.

PLEASE CIRCLE A PICTURE BELOW that MOST CLOSELY resembles a critter that you sighted on your property. If you ALSO observed the critter spraying a stinky, yellow liquid, place a large "X" in the center of the picture.

Thanks for your report. We'll let you know if any additional information is needed!
